

Task 1

Motherboard – The motherboard is the main circuit board of a computer. It connects and allows communication between all the other components.

CPU (Processor) – The CPU is the brain of the computer. It processes instructions and performs calculations.

RAM (Random Access Memory) – RAM is temporary memory used to store data and programs that are currently running.

Storage (SSD/HDD) – SSD or HDD is used to permanently store the operating system, software, documents, photos, videos, and other files.

Power Supply Unit (PSU) – The PSU converts electricity from the wall outlet into the power required by the computer's components.

GPU (Graphics Processing Unit) – The GPU processes images, videos, and graphics and helps display them on the monitor.

CPU Cooler – The CPU cooler removes heat from the processor and prevents it from overheating.

Case Fans – Case fans circulate air inside the cabinet and help keep the computer components cool.

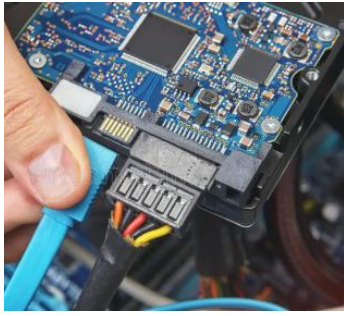

Task 2

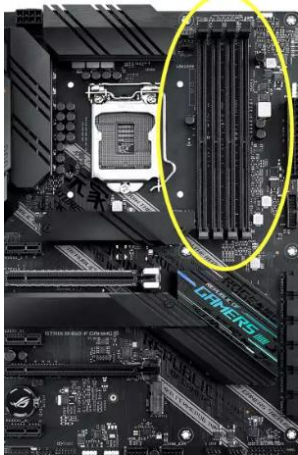

I disconnected the power cable.

I removed the side panel.

I disconnected the internal cables.

I removed the RAM module.

I removed the storage drive.

I removed the motherboard.

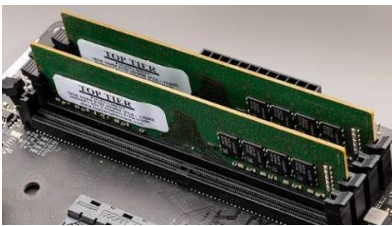

Task 3

MotherBoard installed image

I installed and secured the motherboard inside the cabinet.

RAM installed image

I inserted the RAM into the motherboard slot.

HDD/SSD installed image

I installed the storage drive and connected the SATA cables.

Cables connected image

I connected the motherboard, power and front-panel cables.

GPU installed image

I installed and secured the GPU in the PCIe slot.

Side panel image

I replaced and secured the side panel.

Task 4

Safety Precautions

Precaution	Why Important
Turn off the PC	Prevents damage.
Unplug the power cable	Avoids electric shock.
Use a clean, dry area	Keeps parts safe.
Use an anti-static wrist strap	Protects components from static electricity.
Handle parts carefully	Prevents damage.

Tools Needed

Tool	Use
Screwdriver	To remove and tighten screws.
Anti-static wrist strap	To prevent static damage.
Small container	To keep screws safe.
Cable ties	To organize cables.
